Recital 7 b (new)**

Text proposed by the Commission

Amendment

(7b) Member States should ensure that an effective system is implemented for monitoring possession of firearms. That system, which could be continuous or non-continuous, should be based on an assessment of relevant medical and psychological information upon the issuance or renewal of an authorisation or on an effective alternative system of continuous monitoring taking into account the risks concerned and any relevant indications, for example from medical personnel, indicating that the conditions for allowing possession may no longer be met.

d. Safe storage

Proposal for a directive

Article 1 – paragraph 1 – point 6

Directive 91/477/EEC

Article 5 a (new)

Text proposed by the Commission

Amendment

The following article is added:

Article 5 a (new)

Member States shall establish rules on the proper supervision of firearms and ammunition and rules on their proper storage in a secure way to minimise the risk of being accessed by an unauthorised person. When stored, firearms and ammunition for them shall not be readily accessible together. Supervision in this case shall mean that the person possessing the firearm or the ammunition has control over them during transport and use. The level of scrutiny for the storage arrangements shall correspond to the category of the firearm.

Article 1 – paragraph 1 – point 3

Directive 91-477/EEC

Article 4 – paragraph 1

Text proposed by the Commission

1. Member States shall ensure that any firearm or *part* placed on the market has been marked and registered in compliance with this Directive.

Amendment

1. Member States shall ensure that any *assembled* firearm or *separately sold essential component* placed on the market has been marked and registered in compliance with this Directive, *or that it has been deactivated in accordance with the provisions implementing Article 10b and registered in compliance with this Directive. Proposal for a directive

Article 1 – paragraph 1 – point 3

Directive 91/477/EEC

Article 4 – paragraph 2

Text proposed by the Commission

2. For the purposes of identifying and tracing each assembled firearm, Member States shall, at the time of manufacture of each firearm *or at the time of import to* the Union, require a unique marking including the name of the manufacturer, the country or place of manufacture, the serial number and the year of manufacture, if not already part of the serial number. This shall be without prejudice to the affixing of the manufacturer's trademark.

The marking shall be affixed to the receiver of the firearm.

Member States shall ensure that each elementary package of complete ammunition is marked so as to provide the name of the manufacturer, the identification batch (lot) number, the calibre and the type of ammunition.

Furthermore, Member States shall ensure, at the time of transfer of a firearm from government stocks to permanent civilian use, the unique marking permitting identification of the transferring government.

Amendment

2. For the purposes of identifying and tracing each assembled firearm *and each separately sold essential component*, Member States shall *either* at the time of manufacture of each firearm *and each essential component intended for sale separately, or without delay after imported into* the Union, require a *clear, permanent and* unique marking, including the name of the manufacturer, the country or place of manufacture, the serial number and the year of manufacture, if not already part of the serial number. This shall be without prejudice to the affixing of the manufacturer's trademark *and shall not apply to firearms or essential components either considered as antiques under national law or destined for persons authorised pursuant to the second subparagraph of Article 6, provided they bear original markings permitting full traceability. Where an essential component is too small to be practicably marked with all of this information, it shall be marked at least with a serial number, alphanumeric or digital code. This requirement shall not apply to firearms or separately sold essential components manufactured before the entry into force of this Directive.*

In the case of an assembled firearm the marking shall be affixed to the receiver *or the frame* of the firearm.

Member States shall ensure that each elementary package of complete

ammunition is marked so as to provide the name of the manufacturer, the identification batch (lot) number, the calibre and the type of ammunition. ***For those purposes, Member States shall choose to apply the provisions of the United Nations Convention for the Reciprocal Recognition of Proof Marks on Small Arms of 1 July 1969.***

Furthermore, Member States shall ensure, at the time of transfer of a firearm from government stocks to permanent civilian use, the unique marking permitting identification of the transferring government. ***Firearms classified in Category A must first have been deactivated in accordance with the provisions implementing Article 10b or permanently converted to semi-automatic firearms in accordance with the provisions implementing Article 10ba (new), save in the case of transfers to persons granted authorisations pursuant to the first or the second subparagraph of Article 6.***

Present text

Amendment

"The arrangements for the acquisition and possession of ammunition shall be the same as those for *the possession of the* firearms for which the ammunition is intended."

(7a) *Article 10 is replaced by the following:*

"The arrangements for the acquisition of *ammunition* and possession of ammunition *containing a single projectile* shall be the same as those for the firearms for which the ammunition is intended. *The acquisition of ammunition shall be permitted only for persons who are allowed to possess a firearm of a respective category, or persons authorised pursuant to the second subparagraph of Article 6.*

Brokers and dealers may refuse any transaction for the acquisition of complete

rounds of ammunition, or components of ammunition, which they reasonably consider suspicious owing to its nature or scale, and shall report it or any attempted such transaction to the relevant authorities. Brokers and dealers shall not be permitted to complete a transaction for the acquisition of a firearm where they cannot verify the identity of the purchaser in the data-filing system established according to Article 4(4) and payment is to be made solely in cash.

**Proposal for a directive
Recital 6 b (new)**

Text proposed by the Commission

Amendment

(6b) As is the case with respect to the system of reporting suspicious transactions under Regulation (EU) No 98/2013 of the European Parliament and of the Council, a transaction for the acquisition of complete rounds of ammunition or live primer components of ammunition, should be considered suspicious if, for example, it involves quantities uncommon for the envisaged private use, or if the buyer appears unfamiliar with the use of the ammunition or is unwilling to provide proof of his/her identity. Where it is not possible for a dealer or broker to verify the identity of the purchase any payment solely in cash for the acquisition of firearms should be prohibited.

Proposal for a directive

Article 1 – paragraph 1 – point 6

Directive 91/477/EEC

Article 5 b (new)

Text proposed by the Commission

Amendment

*Member States shall ensure that in case of the acquisition and selling of firearms and their essential components and the ammunition covered by categories A, B, C and D set out in Annex I by means of distance communication, as defined in Article 2 of Directive 2011/83/EC of the European Parliament and of the Council(**), the identity, and where required, the authorisation of the person acquiring the firearm or the essential components thereof or ammunition is checked prior to or at the latest upon delivery thereof to that person, by:*

**Proposal for a directive
Recital 12**

Text proposed by the Commission

Amendment

(12) Selling arrangements of firearms and their components by means of distance communication may pose a serious threat to security as they are more difficult to control than the conventional selling methods, especially as regards the on line verification of the legality of authorisations. It is therefore appropriate to limit the selling of arms and components by means of distance communication, notably internet, to dealers and brokers.

(12) Marketing of firearms, parts and ammunition by means of the internet or other means of distance communication, for example by way of online auction catalogues or classified advertisements, and the arranging of a sale or other transaction by means of, for example, telephone or email should, where allowed under national law, be possible provided that the verification of identity and of the right to engage in such a transaction can be completed. It is therefore appropriate to ensure that the conditions for purchasing firearms, essential components and ammunition by means of distance communication, notably internet, by legal or natural persons other than dealers and brokers allow verification at the time of delivery of at least the identity of the recipients and their right to acquire a firearm by the dealer or broker or by a public authority representative.

Deactivated firearms

Proposal for a directive

Article 1 – paragraph 1 – point 1 – point c

Directive 91/477/EEC

Article 1 – paragraph 1i

Text proposed by the Commission

1i. For the purposes of this Directive, "deactivated firearms" shall mean firearms that have been modified with the purpose of rendering them permanently unfit for use by deactivation, ensuring that all essential *parts* of the firearm have been rendered permanently inoperable and incapable of removal, replacement or a modification that would permit the firearm to be reactivated in any way.

Amendment

1i. For the purposes of this Directive, "deactivated firearms" shall mean firearms that have been modified with the purpose of rendering them permanently unfit for use by deactivation, ensuring that all essential *components* of the firearm have been rendered permanently inoperable and incapable of removal, replacement or a modification that would permit the firearm to be reactivated in any way *in accordance with Article 10b*.

Where weapons are of recognised rarity or historical value, Member States may chose that, for the purposes of deactivation, firearms demonstrating such value may be deactivated by the removal of one or more essential components of the firearm so as to render it unusable. Where this is applied, the components removed shall be handed over to the authorities of the Member State for safekeeping.

Technical specifications for the deactivation of firearms

The deactivation operations to be performed in order to render firearms irreversibly inoperable are defined on the basis of three tables:

Table I lists the different types of firearms,

Table II describes the operations to be performed to render each essential component of firearms irreversibly inoperable,

Table III sets out which deactivation operations are to be performed for the various types of firearm.

TABLE I: List of types of firearms

TYPES OF FIREARMS

<i>1</i>	<i>Pistols (single shot, semi-automatic)</i>
<i>2</i>	<i>Revolvers (including cylinder-loading revolvers)</i>
<i>3</i>	<i>Single-shot long firearms (not break action)</i>
<i>4</i>	<i>Break action firearms (e.g. smoothbore, rifled, combination, falling/rolling block action, short and long firearms)</i>
<i>5</i>	<i>Repeating long firearms (smoothbore, rifled)</i>
<i>6</i>	<i>Semi-automatic long firearms (smoothbore, rifled)</i>

7	<i>(Full) automatic firearms, e.g. selected assault rifles, submachine guns, full automatic pistols (not crew-served machine guns)</i>
8	<i>Muzzle-loading firearms</i>

TABLE II: Specific operations per component

COMPONENT	PROCESS
1. BARREL	<i>1.1. If the barrel is fixed to the frame (1), pin the barrel to action with a hardened steel pin (diameter > 50 % chamber, minimum 4,5 mm) through the chamber and frame. The pin must be welded (2).</i>
	<i>1.2. If the barrel is free (not fixed), cut a longitudinal slot through the full length of the chamber wall (width > 1/2 calibre and maximum 8 mm) and securely weld a plug or a rod into the barrel from the start of the chamber ($L \geq 2/3$rd barrel length). For smoothbore barrels, only the chamber requires permanently blocking with a plug of the same length as the chamber.</i>
	<i>1.3. Within the first third of the barrel from the chamber, either drill holes (must have a minimum of 2/3rds of the diameter of the bore for smoothbore arms and the whole diameter of the bore for all other arms; one behind the other, 3 for short arms, 6 for long arms) or cut, after the chamber, a V slot (angle $60 \pm 5^\circ$) opening locally the barrel or cut, after the chamber, a longitudinal slot (width 8-10 mm \pm 0,5 mm, length ≥ 52 mm) at the same position as the holes, or cut a longitudinal slot (width 4-6 mm \pm 0,5 mm) from the chamber to the muzzle, except 5 mm at the muzzle.</i>
	<i>1.4. For barrels with a feed ramp, remove the feed ramp.</i>
	<i>1.5. Prevent removal of the barrel from the frame by use of hardened steel pin or by welding.</i>
	<i>1.6. Fix a rod in the barrel forcing cone ($L > 2/3$rd barrel length). Weld into forcing cone. Pin the barrel (through forcing cone) to the frame and weld pin. Drill a hole 2/3rd bore diameter within the first third of the barrel from the forcing cone and weld the rod to the barrel through the drilled hole</i>
2. BREECH BLOCK, BOLT HEAD	<i>2.1. Remove or shorten firing pin.</i>
	<i>2.2. Machine the bolt face with an angle of at least 45 degrees and on a surface larger than 50 % of the breech face.</i>
	<i>2.3. Weld the firing pin hole.</i>
3. CYLINDER	<i>3.1. Remove all internal walls from cylinder for a minimum of 2/3rd of its length by machining a circular ring 50% case diameter.</i>

	<i>3.2. Where possible, weld to prevent the removal of the cylinder from the frame or appropriate measures such as pinning that render the removal impossible.</i>
4. SLIDE	<i>4.1. Machine or remove more than 50 % of the breech face with an angle between 45 and 90 degrees.</i>
	<i>4.2. Remove or shorten the firing pin.</i>
	<i>4.3. Machine and weld the firing pin hole.</i>
	<i>4.4. Machine away at least 2/3rd of the locking lugs in slide</i>
	<i>4.5. Where applicable, machine the inside of the upper forward edge of the ejection port in the slide to an angle of 45 degrees.</i>
5. FRAME (PISTOLS)	<i>5.1. Remove feed ramp.</i>
	<i>5.2. Machine away at least 2/3 of the slide rails on both sides of the frame.</i>
	<i>5.3. Weld the slide stop or use appropriate measures if welding is not possible.</i>
	<i>5.4. Prevent disassembly of polymer frame pistols by welding, bonding or use appropriate measures if welding or bonding is not possible.</i>
6. AUTOMATIC SYSTEM	<i>6.1. Destroy the piston and the gas system by cutting or welding.</i>
	<i>6.2. Remove the breech block, replace it by a steel piece and weld it or reduce the breech block by 50 % minimum, weld it and cut off locking lugs from the bolt head.</i>
	<i>6.3. Weld the trigger mechanism together and, if possible, with the frame. If welding within the frame is not possible: remove the firing mechanism and fill the empty space appropriately (e.g. by gluing in a fitting piece of filling with epoxy resin).</i>
7. ACTION	<i>7.1. Machine a cone of 60 degrees minimum (apex angle), in order to obtain a base diameter equal to 1 cm at least or the diameter of the breech face.</i>
	<i>7.2. Remove the firing pin, enlarge the firing pin hole at a minimum diameter of 5 mm and weld the firing pin hole.</i>
8. MAGAZINE (where applicable)	<i>8.1. Weld the magazine with spots or use appropriate measures, depending on the type of arm and material to prevent removing the magazine.</i>
	<i>8.2. If the magazine is missing, place spots of weld in the magazine location or fix a lock to permanently prevent the insertion of a magazine.</i>
	<i>8.3. Drive hardened steel pin through magazine, chamber and frame. Secure by weld.</i>

9. MUZZLE LOADING	9.1. Remove or weld the nipple(s), weld the hole(s).
10. SOUND MODERATOR	10.1. Prevent removal of the sound moderator from the barrel by use of hardened steel pin or weld if the sound moderator is part of the weapon.
	10.2. Remove all the inner parts and their attachment points of the moderator so that only a tube remains. Drill two holes in the casing (5mm) in diameter near the point the sound moderator attaches to the barrel.
